

WORKSTIPATION REFORM

PETITION

As a valuable employee, it's time we open up the discussion about _____ Workstipation as we head back to the office. Workstipation is feeling unable to free your gut at work due to stressful bathroom conditions. And as we discovered, a stressed gut can lead to a stressed mind. Being able to freely free our guts, stress free, is any office-goer's right.

We've been going from the comfort of our homes for over a year, and we've learned the importance of a relaxed mind and a relaxed gut. From here on out, we demand (ok, kindly request) every office bathroom be a comfortable and stress-free place to "go" during work.

OUR DEMANDS

CLOSE THE STALL GAP.
No more stress from possible peepers.

PRIVACY PLEASE.
No shoe should be easily linked to any gut-freeing noises.

PERSONAL SPACE.
No more waiting for alone time to be freed.

TOLERABLE SMELL.
No more holding our breath to go, we deserve a pleasant fragrance.

Let's work together to put our minds and our guts at ease. After all, we cannot feel free at work, until our guts can be freed at work.
